PROFESSIONAL SUMMARY

Aspiring Junior AI Developer and 2026 B. Tech (AI & Data Science) graduate skilled in Python, Machine Learning, and Deep Learning, building practical real-world AI products. Skilled in LLM-powered systems, and end-to-end RAG pipelines using LangChain, Llama 3.3, and vector databases (ChromaDB). Experienced in AI integration with web/mobile apps via REST APIs, backend services, and Git version control. A fast-learning, independent problem-solver with strong analytical thinking, passionate about building real AI solutions.

TECHNICAL SKILLS

Languages:	Python, SQL, MySQL
Frameworks & Libraries:	DeepEval, Lang Graph, Fast API, OpenCV
Database & Vector Stores:	MySQL, Chroma DB
Dev Tools & Platforms:	Git, GitHub, Webuzo, Postman, VS Code, Cursor
AI/LLM:	RAG Pipelines, AI Agents, Hugging face Embeddings, Claude Code
APIs & Security:	REST APIs, JWT Authentication
Other:	Whisper, TTS, Sarvam AI, Context Engineering.

WORK EXPERIENCE

AI Developer Intern — **NeuralArc Global Pvt Ltd**, Coimbatore *Jun 2026 – Present*

- Built a self-healing RAG pipeline in LangChain with a Critic-agent retry loop to ground Llama 3.3 70B answers and reduce hallucinations.
- Implemented vector-database retrieval using ChromaDB with HuggingFace embeddings to serve semantic context to the LLM for grounded question answering.
- Developed an AI-integration layer connecting a Node.js service to a Flask LLM backend with Redis-cached retrieval to cut redundant LLM calls.

AI Engineer Intern — **Pantech Solutions**, Online *May 2025 – Jul 2025*

- Built real-time computer-vision pipelines with OpenCV for object, vehicle, and motion detection and a PyTorch-based facial emotion recognition app with live webcam capture.
- Designed and trained image-classification CNNs from scratch for character and image recognition tasks.

PROJECTS

AI Agent Evaluation using DeepEval: *Oct 2026 – Oct 2026*

- Built an AI agent evaluation using DeepEval, Lang Chain agents, models, custom tools and Pydantic-based structured outputs to evaluate agent responses.

Chatbot RAG Pipelines: *Jul 2025 – May2025*

- Build a Node.js/Express RAG backend combining a MySQL knowledge base with live Playwright-scraped website.

Emotion Recognition using OpenCV: *Jun 2025 – Jul 2025*

- Built a real-time facial emotion recognition using PyTorch deep-learning model, integrated with OpenCV live webcam capture to classify and overlay emotions on each video frame.

EDUCATION

Anna University Affiliated College, Coimbatore *2022 – 2026*

Bachelor of Technology — Artificial Intelligence and Data Science | CGPA: 8.6

CERTIFICATIONS

- Internship on AI, Python & Machine Learning — Pantech Solutions (Certified)
- ChatGPT & AI Tools — be10X Certification
